# P. MANOJ KUMAR

Application Support | Incident Management | Root Cause Analysis | Python Automation
+91 9933247714 • manojkpkumar4@gmail.com • linkedin.com/in/p-manoj-kumar-380a35276

## PROFESSIONAL SUMMARY

Dedicated Technical Support Engineer with 1+ year of experience at eSSL Pvt. Ltd., managing incident resolution, root cause analysis, and application stability across staging and production environments. Proven ability to diagnose complex application failures, coordinate with development teams for fix validation, and maintain detailed support documentation. Supplemented by hands-on Python scripting skills used to automate repetitive support tasks and streamline workflows. Looking to grow in an Application Support role within a fast-paced product or IT services environment.

## TECHNICAL SKILLS

**Application Support:** Incident Management, Root Cause Analysis (RCA), Log Analysis, UAT, Defect Tracking, Post-deployment Validation, KEDB Management, SOP Documentation
**Programming & Scripting:** Python, C
**Database:** SQL (MySQL / SQLite)
**AI & Automation:** LangChain, Selenium, Prompt Engineering, API Integration
**Tools & Platforms:** GitHub, VS Code, Linux/Windows environments, Ticketing Systems (Jira/ServiceNow-equivalent)
**Hardware & Networking:** Computer hardware troubleshooting, Networking basics, LAN/WAN fundamentals

## WORK EXPERIENCE

**eSSL Pvt. Ltd.** *July 2024 – Present*
**Technical Support Engineer**

- Handled end-to-end incident management — receiving, triaging, and resolving application issues by analyzing logs, system events, and database configurations across staging and production environments.
- Performed root cause analysis (RCA) of application failures and integration errors by reproducing issues in test environments, preventing recurrence and reducing ticket volume.
- Supported application deployments, patch updates, and version upgrades — coordinating pre- and post-deployment checks to ensure zero-defect releases.
- Partnered with development teams for fix validation, regression testing, and UAT sign-off before production releases.
- Proactively monitored application and system performance to detect anomalies early and prevent incidents before they impacted end users.
- Built and maintained a knowledge base of SOPs, troubleshooting run books, and Known Error Database (KEDB) entries — cutting average resolution time for repeat issues.

## PROJECTS

**AI Web Scraper** | *Python · Selenium · LangChain · Gemini API*

- Built an AI-assisted web scraper that interprets natural-language queries using Gemini API and automates data extraction via Selenium.
- Orchestrated end-to-end workflows using LangChain, enabling complex multi-step extraction pipelines without manual intervention.
- Delivered structured, analysis-ready outputs — significantly reducing time spent on repetitive data gathering tasks.

**Secure Password Manager** | *Python · Fernet Encryption · PBKDF2 · CLI*

- Designed a CLI-based password manager implementing industry-standard Fernet encryption with PBKDF2-derived keys for secure credential storage.
- Added customizable random password generation and robust input validation for production-safe usage.

**EduConnect Portal** | *Team Project · Stock Management Module*

- Contributed to a digital platform connecting students, parents, teachers, and administration, specifically improving the Stock Management module's workflow and usability.

## EDUCATION

**Sri Venkateswaraa College of Engineering and Technology** *2020 – 2024*

**B.Tech – Computer Science Engineering**

CGPA: 7.3 / 10

## CERTIFICATIONS

- Computer Hardware and Networking — VYK Academy
- Diploma in Computer Applications (DCA) — ISIT Computer College
